M.A.I.O.R.
A CLEVER DEVICES COMPANY

Mtram analysis

The **MTRAM Suite** by M.A.I.O.R is a powerful and integrated scheduling solution that simplifies and optimizes transportation planning, scheduling, rostering, daily management and data analysis to ensure that you are creating the most reliable, efficient and cost effective service possible.

Evaluating your performed service and continuously improving your schedules can be one of the most complicated tasks at your agency; without accurate reporting its impossible to truly understand if the service you delivered actually met the needs of your riders. MTRAM Analysis is an intuitive and easy to use tool that provides you with business intelligence and robust running times analysis that enables you to effectively monitor and improve your service to better meet the needs of your riders.

FEATURES & BENEFITS

Monitor with Key Performance Indicators

MTRAM Analysis helps you monitor the adherence to your schedule. Leverage Key Performance Indicators (KPIs) such as service punctuality, frequency, or lost mileage to quickly identify areas of concern when the actual service delivered doesn't match the service you planned.

Optimized Running Times

Armed with data from your CAD/AVL system, MTRAM Analysis uses a powerful algorithm to automatically calculate optimal running times. As running times can vary throughout the day, MTRAM Analysis further recommends optimal time bands. It helps you to easily compare planned vs. actual running times simultaneously.
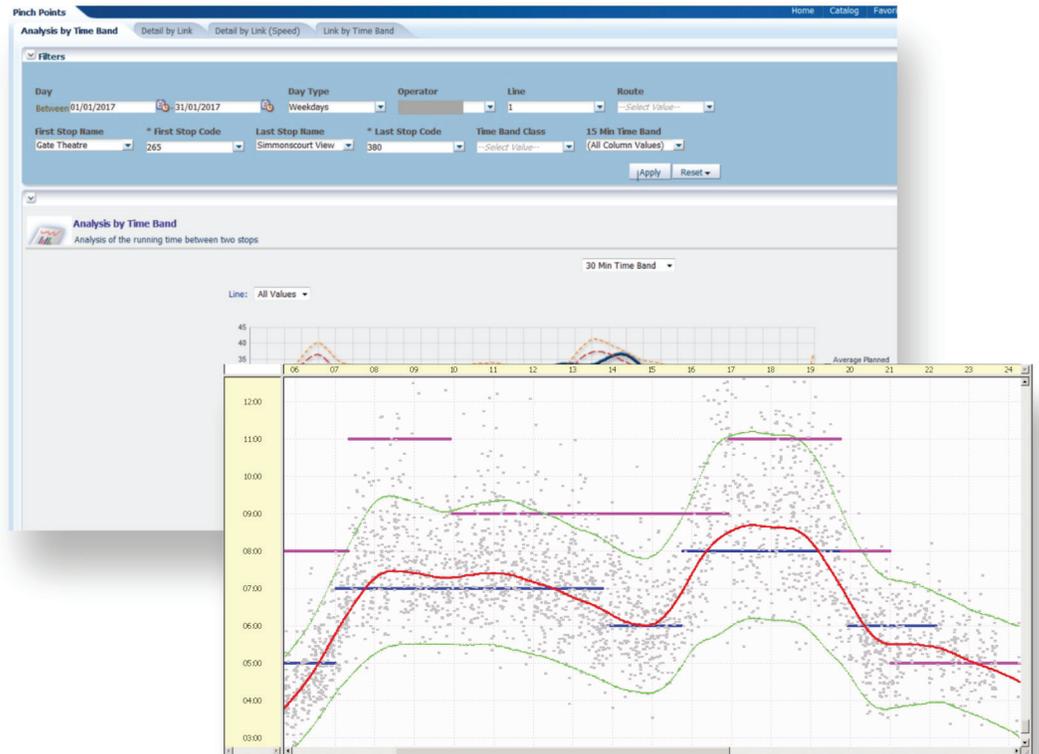

Driver Analysis

MTRAM Analysis enables you to monitor the efficiency of a drivers performance; track working time and overtime.

The tool lets you monitor overtime for all employees and can track employee information such as full-time and part-time employment, age, categories, seniority, and residence. Driver absences can also be analyzed daily or by type.

Run Multiple Reports

MTRAM Analysis provides you with historical data you can use to evaluate the service you provide. Reports can be filtered and sorted to help analyze your costs, driver productivity, schedule and vehicle adherence as well as other key components of your system.

M.A.I.O.R. designs and develops transit scheduling solutions for public transportation companies around the world.

MTRAM Analysis helps you transform your service data into knowledge that can be used for strategic decisions.
